EXPERIENCE

Software Engineer

January 2025 – Present

Nagarro

Gurugram

- Developed **Spring Boot** service layers leveraging **Java 8+** features — **streams**, **lambdas**, and **Optional** — within the Phoenix OS platform; authored **JUnit** and **Mockito** unit test suites as part of mandatory **TDD** compliance gates.
- Engineered a **Context Retention System** with strict **TDD Quality Gates**; enforced mandatory interface definitions and failing tests (Red Phase) before implementation via automated compliance checks.
- Built **Atomic React.js** components from design specifications, enforcing reusable **Tailwind** design token patterns; participated in structured **code reviews** and applied **clean code** principles, cutting frontend handoff time by **85%**.
- Developed a **DevOps Orchestration Agent** that automates **multi-cloud CI/CD setup** (Azure/AWS/GCP) for existing infrastructure, generating 30+ configuration files and integrating **DevSecOps** safeguards.
- Enhanced **iLease** (Erste Bank FinTech platform) by optimizing **Spring Boot** microservices and **multi-threaded modules**, achieving a **15% improvement** in data throughput for high-volume transactions.

Full Stack Intern

August 2024 – October 2024

TailorTalk

Remote

- Led full-stack development in an **Agile** setup; revamped AI assistant and optimized backend APIs through **SEO** and **Lighthouse** audits, boosting user engagement by **25%**, site speed by **30%**, and data efficiency by **40%**.
- Version-controlled features with **Git** in an **Agile/Scrum** workflow; collaborated on **RESTful API** integrations and maintained clean, modular **Java**-style backend code following established best practices.

PROJECTS

TaskForge | *Spring Boot 3, Next.js 14, MySQL, JWT, JUnit*

[GitHub](#)

- Shipped a **self-hosted Jira-style tracker** with **5-tier RBAC** using **Spring Security + JWT** and **Kanban dashboards** featuring comprehensive **REST API** documentation via Swagger.
- Containerized** with **Docker + docker-compose** for one-command spin-up and integrated **Spring Scheduler** e-mail reminders, improving on-time task closure by **40%**.
- Engineered a **drag-and-drop Kanban board** delivering sub-**100ms** transitions for **500+ concurrent users**; implemented **JUnit** test coverage for critical service-layer business logic.

Cryptonite | *Next.js 14, React 18, CoinGecko API, Recharts*

[Live Demo](#)

- Built a **PWA crypto-trading simulator** with **offline INR wallet**, **live coin data**, and **CSV portfolio export**; architected **multi-layer caching** reducing API calls by **80%**.
- Optimized **React** rendering with **react-window**, cutting **10,000-row table** draw time by **65%**; charts load in **under 200ms** with **smart caching strategies**.

ACHIEVEMENTS & CERTIFICATIONS

- Selected for **Amazon ML Summer School'23** from over **60,000+ applicants nationwide** (~5% acceptance rate); gained expertise in **probabilistic graphical models**, **reinforcement learning**, **deep neural networks**, **unsupervised learning**, and **supervised learning**.
- Achieved **Specialist rank on CodeForces (top 15% globally)** with **1600+ rating**, solving **500+ algorithmic problems** with proven expertise in advanced data structures and algorithms.
- Certified in **AWS Academy Cloud Developing** and **AWS Academy Cloud Foundations**.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+), TypeScript, SQL, C, HTML5, CSS3

Frameworks & Libraries: Spring Boot, Spring Security, Hibernate, React.js, Next.js 14, Node.js, Express.js, JUnit

Cloud & DevOps: Azure, Amazon Web Services (AWS), Docker, Jenkins, SonarQube, GitHub Actions, Git, CI/CD

Databases & APIs: MongoDB, MySQL, REST API, JWT, OAuth 2.0

Computer Science Foundations: System Design, Microservices Architecture, Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Operating Systems, DBMS, Computer Networks, Distributed Systems

EDUCATION

The NorthCap University, Gurugram

Bachelor of Technology in Computer Science

CGPA: 8.53

2021 – 2025
